

Data Science with R Language

In this training, you will learn the fundamentals of R syntax, including assigning variables and making simple operations with vectors, most important data structures in R. From vectors, you will then learn about lists, matrix, arrays and data frames. Finally, visualizations for data science in R will be presented at the end of this course.

After this 2-day digital training, **you will be ready to undertake your first very own data analysis.**

When? 24 & 25 November 2020
from 9:00 am to 5:00 pm

Where? Digital Training

Who? Jaruan Mesit, Ph.D.
